Introduction
History of AK
The Triad of Health
Muscle Facilitation and Inhibition
Postural Analysis
Therapy Localization
Muscle Origin/Insertion Technique
Golgi Tendon,
Neuromuscular Spindle Technique
Neurolymphatic Reflexes
Acupuncture Meridian Connectors,
introduction
The Art and Science of Muscle Testing
Neurovascular Reflexes
Nutrient testing, *introduction*
Vertebral Challenge
Respiratory Adjustment
Muscle Tests for Low Back/Pelvis
Lovett Reactor Vertebrae

Session Two*

December 3-4, 2016

Review of Session One
Cranial Primary Respiratory Mechanism
Neck Flexors
Cranial Inspiratory Assist Correction
Cranial Expiratory Assist Correction
Sacral Primary Respiratory Mechanism
Sacral Inspiratory and
Expiratory Assist Correction
Adrenal Stress Disorder
Injury Recall Technique
Pelvic Category Two
Pelvic Support Muscle Tests
Functional Hypoglycemia
Extremities - *introduction*
pH considerations

Session Three*

January 7-8, 2017

Review of Session Two
Trigger Points
Fascial Release
Myofascial Gelosis
Pelvic Category One
Spinal Fixation Analysis
Muscle Tests for Upper Back
and Shoulder
Ileocecal Valve Therapy
Retrograde Lymphatic Technique
Ligament Stretch Response
Strain/Counterstrain Technique
Emotional Neurovascular Reflex

Session Four*

February 4-5, 2017

Neurological Disorganization
Ocular Lock
Lumbar disc protrusion
Pelvic category III
Imbrication
Review of category I & fixations
Extended foot pronation
Tarsal tunnel syndrome
Gait testing and correction
Low back and disc associated muscles
Foot/ankle stabilizing muscles
Heel Lifts
Thyroid function
Reactive Muscles

Session Five*

March 25-26, 2017

Cervical disc
Cervical Imbrication
Hidden cervical disc
Carpal tunnel syndrome
Pisiform-Hamate syndrome
Pitch, Roll, Yaw, Tilt imbalances
Meridian therapy part I
Introduction to Chi
Principles of Yin/Yang
Flow or meridian energy in the body
Meridians
Alarm Points
Pulse diagnosis
Meridian Beginning and End Technique
Tonification/sedation points
Diaphragm Involvement
Hiatal Hernia

Session Six*

April 22-23, 2017

Cranial review
"Rebound" theory of cranial adjusting
Cranial Stress Receptors
Spheno-Basilar Cranial Correction
Glabella cranial fault
Temporal bulge fault
Parietal descent fault
Internal and External rotation faults
Nasophenoid Fault
Basic sutural faults
Sagittal Suture Cranial Fault
Cruciate suture fault
Mandibular spread technique
Temporomandibular joint
Neurological tooth involvement
Hyoid Balance
Ligament Interlink Technique
Iliolumbar ligament therapy
Dural Tension/Stride length
Meningeal Release technique

Session Seven*

May 20-21, 2017

Hologrammic subluxations
Knee problems
Parathyroid function
Allergies
Meridian therapy part II
Review of part I
24 hour circulation of Energy
Sheng and Ko Cycles
Midday/midnight effect
Luo point therapy
Hypertension
Mental and Emotional Health
Psychological Reversals, Phobias
Right, Left Brain Testing
Learning Problems, ADD
Aerobic-Anaerobic Muscle testing
Cutaneous receptors and scars

Session Eight*

July 15-16, 2017

Five Element Flow of Energy
Meridian Pain control
Shoulder problems
Elbow problems
Shoulder/elbow muscles
Slipped bicipital tendon
Endocrine balancing
Pituitary drive technique
Female problems, PMS, Male Problems
Uterine lift
Digestive difficulties
Practice integration:
Organizing the various techniques
Liver Function
Colon Function
Joint, Arthritis Nutrition
Essential Fatty Acids

**Dates may be subject to change.*

James D.W. Hogg, D.C.

Dr. Hogg graduated from Palmer College of Chiropractic in 1982. While at Palmer he served as President of the AK Club and as workshop assistant for the 100 hour AK Seminars. His thirty-three years of experience teaching over 3800 hours of Applied Kinesiology has included numerous Chiropractic and Dental groups. He is a Certified Diplomate of the International Board of Applied Kinesiology. As Chair of the USA Board of Certified Teachers and International Curriculum Committee, Dr. Hogg oversees teaching policy in the United States and coordinates international teaching curricula.

Dr. Hogg looks forward to sharing the incredible art and science of Applied Kinesiology with you in a well focused yet playful learning environment.

Become a more effective, knowledgeable physician.

Applied Kinesiology gives you the ability to evaluate body function in a holistic way, with your heart, mind and hands. It yields immediate specific data to successfully treat your patients, with immediate results both you and your patients can see. And, now, the course includes AK Mini-Course!

AK MINI-COURSE

Session One and Session Two now comprise a core “AK Mini-Course”. Many of the most commonly used AK techniques are included to provide an AK technique package for those who want to use AK but may not want to go on to certification at this time. Special AK Mini-Course price: Doctors \$680 Students \$300

Practice Management

PATIENT EDUCATION; Ideas and materials to help your patients understand AK. A **FORMAT** to help introduce newly learned procedures in your practice. New AK protocol sessions have been added to help integrate and organize the many powerful tools taught in this series.

ICAK Accreditation

Sessions will be credited toward becoming certified in Applied Kinesiology and in achieving Diplomate Status through the International College of Applied Kinesiology.
